Re: Niagara Bottled Water Recall Information

Dear Mayor:

The New Jersey Department of Health (DOH) has forwarded a notice to your Health Officer providing advice regarding the recall of Niagara bottled water.

We encourage you to work with your Health Officer to develop your public information/notification response, especially considering the need for water during this heat wave. You can also access the latest information on this matter at the company website at <http://www.niagarawater.com/consumer-notice/>

Very truly yours,

William G. Dressel, Jr.
Executive Director
